

VEGAXOS

In the modern world of smart buildings, it is important to install an all in one solution to connect outdoor/indoor communication while allowing residents to view visitors and CCTV from their own premise before confirming access to anyone outside the building. Increase security, privacy and efficiency with Vega X OS Smart Video Intercom.

Customize with logos and APK

Display your own buildings logo and background or go a step further and use your own APK for a fully custom Vega OS.

Save time calling indoor units

Multiple indoor unit calling reduces time and allows residents to receive calls from anywhere in their unit.

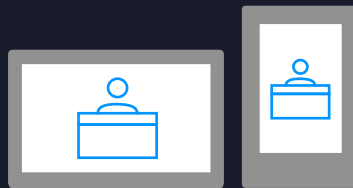

Activate front door relays

Save time by allowing indoor units activate front door relays.

Increase security with pins

Restrict access to only those with permission using access pins and RFID passes.

Concierge communication

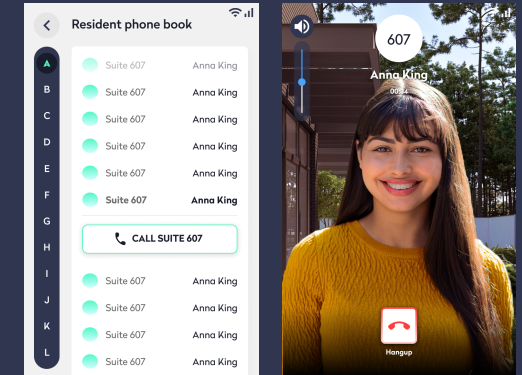

Setup a concierge unit to make calls as well as receive calls from indoor units.

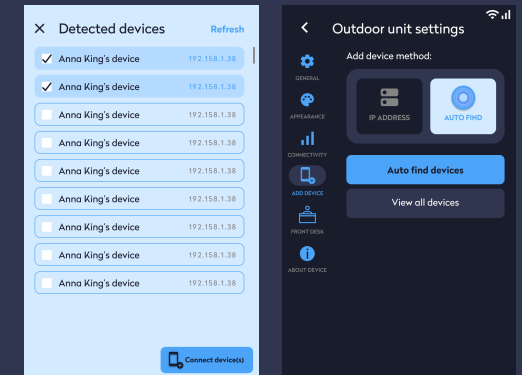

Call duration limit

Save bandwidth with call duration limit so you never have to worry about exceeding transfer data quotas.

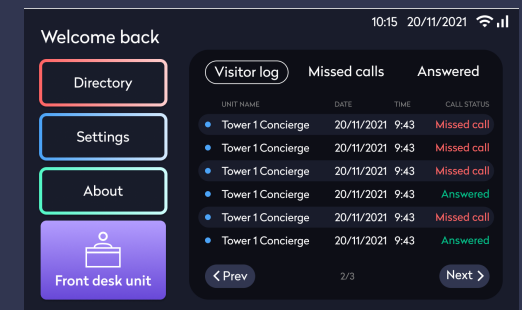

Browse resident phone book to call

Easy indoor-outdoor device connection

View call logs and set concierge unit
